SUMMARY

I'm a front-end developer. I have experience working on several projects using React Js Framework technology and other libraries. I focus on state management, UI cutting, and API usage. Overall, I blend conceptual understanding with technical skills to create stunning user experiences and complex interfaces in frontend development.

EXPERIENCE

Freelance
Frontend Developer
April-May, 2023

Make inquiries to clients about the projects made. In making it, I design the appropriate system, and do a test run to make sure the website functions properly. In addition, in overcoming various challenges and problems in projects, I have the ability to solve problems with a positive and creative attitude. I am committed to ensuring that customers are satisfied with the results of the projects I work on

Tech Stack : React Js, Redux , React-Query

PROJECT

MyCatatan
April, 2023

Tech Stack : React Js

Notes application using React Js allows users to create, read, update and delete notes. Built with reusable components, these applications can be developed quickly and efficiently, and are responsive and interactive for users.
