SUMMARY

I'm a front-end developer. I have experience working on several projects using React Js Framework technology and other libraries. I focus on state management, Slicing UI, and Integration with API. Overall, I blend conceptual understanding with technical skills to create stunning user experiences and complex interfaces in frontend development.

EXPERIENCE

Freelance   April–Now, 2023
Frontend Developer

- Committed to ensuring that the client is satisfied with the final project outcome
- Designing a system that aligns with the project's vision and requirements
